

# Dave Bettner

AI Implementation · Solutions Architecture · Forward-Deployed Delivery

Des Moines, Iowa · dbett4@gmail.com · davebettner.com · github.com/dbett4 · linkedin.com/in/dave-bettner

## SUMMARY

Forward-deployed operator who takes AI and reporting-system work from an unclear starting point to something a team can run, audit, and hand off. Ten-plus years in regulated enterprise delivery—financial reporting, controls, implementation, and adoption—not career software engineering or ML research. Recent public work focuses on MCP integrations, deployment labs, confirm-before-write quality checks, and credential-free proof harnesses.

## EXPERIENCE

|                                                                                                                                                                                                                                                       |                       |
