SUMMARY

Customer-facing solutions and implementation leader with 10+ years turning unfamiliar enterprise workflows and technical constraints into signed-off deployments. Owns discovery, scoping, demos, integration design, debugging, validation, and adoption across regulated environments. Hands-on Python and TypeScript work includes MCP integrations, guarded agent tools, failure injection, idempotent recovery, Docker Compose labs, and a policy-bounded Hermes evaluation kit.

EXPERIENCE

LSL, LLP · Senior Manager

Chicago, then Des Moines

Nov 2025 – Present

- Support proposals, SOW scoping and negotiation, estimates, quotes, and RFP responses for municipal finance and ERP-connected reporting.
- Run on-site demos and pitch presentations against decision criteria; carry delivery handoffs through adoption.
- Build controlled review workflows with human sign-off on customer-impacting changes.

Citrin Cooperman · Manager of Digital Services

Workiva-platform finance and regulatory reporting rollouts

Dec 2024 – Oct 2025

- Directed reporting rollouts across a five-person team.
- Owned national healthcare enterprise certification: bidirectional API integration and executive sign-off through go-live.

Workiva · Solutions Architect

Oct 2022 – Oct 2024

- Led concurrent GRC and financial-reporting implementations from discovery through go-live.
- Scoped SSO, API, and ERP integration architecture with finance, audit, IT, and executive sponsors.

Ambra Health · Solutions Consultant

Sept 2021 – Oct 2022

- Deployed HIPAA-controlled imaging workflows, EHR interfaces, and portal integrations through an acquisition transition.

Workiva · SEC Reporting Consultant

Sept 2015 – Sept 2021

- SEC reporting and XBRL across GAAP, IFRS, and ESEF under quarterly filing deadline pressure.

PUBLIC ENGINEERING (BY FUNCTION)

Hermes Deployment Lab

github.com/dbett4/hermes-enterprise-deployment-lab

Compose-configured lab with FastMCP, mock enterprise API, and workflow runner. Exercises remote-write/local-failure mismatch, separated operator approval, and idempotent retry so side effects happen once. Public Actions run 31892965924 at release commit 1e68676 attests container startup and restart/replay, native Prometheus, causally linked OpenTelemetry, fresh-clone reproduction, and no-apply cloud IaC. Synthetic lab, not a customer deployment.

[241 public credential-free tests](#) · [v1.0.0](#) · [four-job CI](#) · [synthetic failure/replay](#)

Hermes Enterprise Evaluation Kit

github.com/dbett4/hermes-enterprise-evaluation-kit

Policy-bounded evaluation layer for Hermes: approved configs, independent checks, human review gates, and receipts that keep weak evidence labeled weak.

[Offline proof](#) · [8 negative tests](#) · [synthetic live run remains needs_review](#)

Regulated Reporting MCP

github.com/dbett4/regulated-reporting-mcp

OAuth-backed MCP integration for a Workiva-shaped reporting API: pagination, async jobs, controlled mutations, and a three-tool guarded default over a 117-tool catalog.

[126 credential-free tests](#) · [117 contracts](#) · [offline demo](#)

SKILLS

- Python
- Docker Compose
- Hermes Agent
- MCP/FastMCP
- OAuth/API integration
- idempotency/failure recovery
- GitHub Actions
- forward-deployed delivery
- policy packs/human review gates
- failure injection/debugging

EDUCATION

Iowa State University

M.Acc. 2017 · B.S. Accounting 2016
