

Dave Bettner

Forward Deployed Engineer · Enterprise AI Integrations · Financial Reporting Systems

Des Moines, Iowa · dbett4@gmail.com · davebettner.com · github.com/dbett4

SUMMARY

Customer-facing technical leader who translates complex business requirements into enterprise reporting, data integrations, and operational workflows—from discovery and system design through UAT, adoption, and sign-off. Experienced across Workiva, REST APIs, identity and access, ERP-connected reporting, and financial data reconciliation. Builds internal agent-assisted delivery systems and public portfolio projects with bounded tools, readback, failure recovery, evaluation, and human review.

EXPERIENCE

LSL, LLP · Senior Manager

Nov 2025 – Present

- Lead LSL's Workiva services department, translating city and county finance requirements into reporting solutions and running user sessions, UAT, training, and sign-off.
- Built and operate an internal, human-approved multi-agent delivery control plane that dispatches coding assistants to build and QA client reporting workbooks; it enforces allowlisted actions and native readback before client use.
- Built a Python tool that reads source ledgers and generates Workiva data links, formulas, and QA checks for municipal Annual Comprehensive Financial Report (ACFR) and Budget Book engagements, automating repetitive setup and surfacing exceptions for review.
- Run concurrent implementations from source-data reconciliation and statement tie-out through training and client acceptance; shape bids, SOWs, estimates, demos, and handoffs across the delivery lifecycle.

Citrin Cooperman · Manager of Digital Services

Dec 2024 – Oct 2025

- Led a five-person delivery team through discovery, design, and build of a Workiva data-collection and reporting automation with bidirectional API integration and SSO to the customer's system of record.
- Configured spreadsheets, documents, links, formulas, tables, queries, and workflows; translated customer requirements into testable reporting flows and ran UAT through go-live.

Workiva · Solutions Architect

Oct 2022 – Oct 2024

- Led concurrent governance, risk, and compliance (GRC) and financial-reporting implementations from discovery, requirements, and solution design through acceptance and adoption.
- Owned requirements, data mapping, UAT, identity/access testing, and SSO, API, and ERP integration design, coordinating customer and internal stakeholders through delivery.
- Partnered with Product and Engineering to surface customer feedback, manage escalations, and address rollout risks.

Ambra Health · Solutions Consultant

Sep 2021 – Oct 2022

- Deployed HIPAA-controlled imaging workflows, EHR interfaces, and portal integrations for healthcare customers during an acquisition transition.

Workiva · SEC Reporting Consultant

Sep 2015 – Sep 2021

- Delivered recurring SEC reporting and XBRL services across GAAP and IFRS, including European Single Electronic Format (ESEF) filing requirements, for 20+ public-company customers each quarter; coordinated data, review, and filing deadlines across recurring reporting cycles.

SELECTED PUBLIC PROJECTS · davebettner.com/work

Public portfolio projects demonstrate how to make agentic systems observable, bounded, recoverable, and safe for human review.

- **AI Work Control System** — Built a control and audit interface that records requested actions, allowlisted changes, diffs, and human approvals so operators can inspect what an assistant attempted before adopting the result.
- **Recover a Failed Update** — Implemented idempotent read-after-write verification and safe retry handling for ambiguous network failures, checking the first result before attempting the same update again.
- **Guarded Reporting Connector** — Exposed allowlisted reporting actions through Model Context Protocol (MCP)/FastMCP with pre-change approval and native result readback, keeping the assistant inside an explicit action boundary.
- **Prevent Repeat Work** — Added deduplication keys, lease protection, and delivery receipts to prevent duplicate recurring-job execution and preserve a trace of what happened.

TECHNICAL SKILLS

Python · REST APIs · OAuth 2.0 · SSO · Model Context Protocol (MCP)/FastMCP · Docker Compose · GitHub Actions

EDUCATION

Iowa State University

M.Acc. 2017 · B.S. Accounting 2016
